6. **MEASURABLE FIGURES: CUSTOMER PATTERN MOVING FROM ELECTRONIC BUSINESS TO MOBILE TRADE BUSINESS**
   
   Customer inclinations are changing from electronic to mobile trade, as proven by insights from incredibly famous statistical research firms.

   1. According to Statista's exploration data set, India has 1.1 billion cellphone clients while China has 1.5 billion. Around the world, the cell phone is turning out to be progressively significant. As indicated by the review, in 2019, 67 percent of the total populace possesses a cell phone.

   2. According to OuterBox's information base, 79% of cell phone clients utilized their telephones to shop online over the most recent a half year.

   3. According to Statista's research database, mobile commerce sales forecasts indicate that by 2021, smartphones would cover 59 percent of US retail electronic commerce.

   4. Transactions by smartphone have expanded dramatically, according to Statista's research database. Mobile commerce is still growing at a rate of 29%, compared to 22% for electronic commerce.

   5. According to Invesp's current study database, between 8% and 10% of people continue to shop online using their smartphones. Shopping on a desktop has been observed to be decreasing year after year, from 78 percent to 63 percent.

   6. According to Allied Market Study's current research database, global mobile payment is rapidly rising in numerous areas. By 2023, the mobile payment market is expected to be worth $4,574 billion.

   7. Retail business is rising with digital wallet, according to Zion Market Research's latest research database. Users of smart phones are increasingly requiring digital wallets. According to study, this industry would be worth $3142.2 billion globally by 2022.

   8. As indicated by Stastica's exploration information base, utilizing cellphones to make buys at retail location (POS) is known as closeness portable installment exchange, and it is one of the quickest developing m-business patterns, with 721 million clients around the world.

7. **DIGITAL WALLETS IN INDIA & UPI PAYMENT APP**
   As buying patterns continue to change as a result of Covid 19, mobile and digital wallets in India have also changed. Mobile wallets and digital payment apps have surpassed credit card usage and are gradually replacing traditional payment methods, thanks to UPI, which makes payments frictionless. (Mishra, 2015) Google Pay (formerly known as Tez), PhonePe (formerly part of Google) and MobiKwik are examples of the competitive mobile wallet market in India.
Flipkart), Dhani App (part of the Indiabulls group), BHIM Axis Pay (a UPI banking app), PayTM (one of the largest mobile commerce platforms), MobiKwik, Yono by SBI, ICICI Pockets, HDFC PayZapp, Amazon Pay, and others are among the digital wallets available in the Indian market.

8 COVID-19 EFFECT ON UPI TRANSACTIONS THROUGH MOBILE

Public Installments Partnership of India (NPCI) presented UPI on August 26, 2016. Somewhere in the range of 2016 and 2020, the aggregate sum exchanged on the UPI stage was Rs. 43.45 lakh crore. Among Spring and August 2020, 14.26 lakh crore was traded. This adds up to over 33% of the whole sum executed through versatile on this stage during the most recent four years (32.82%). UPI exchanges have expanded significantly. Following the pandemic, the volume of exchanges on the UPI network likewise flooded. Complete advanced installments through computerized wallet moved from 2183.8 Rs. thousand Crore in May 2020 to 2539.5 Rs. thousand Crore in May 2021, as indicated by data from the Public Installments Enterprise of India (NPCI).

This flood gives off an impression of being because of little ticket sums and a longing for contactless installments. Truth be told, inside the most recent a half year, the normal number of day by day portable exchanges has expanded. In August 2020, there were generally 5.22 crore day by day versatile exchanges, contrasted with 3.33 crore in April 2020. During the long stretches of Spring to August 2019, notwithstanding, normal every day exchanges inside the 3 crore level.

9. VALUE OF RETAIL M-BUSINESS SALES

M-business retail deals in India from 2015 to 2020. By 2020, India’s versatile retail internet business deals are relied upon to arrive at roughly 38 billion dollars. This was a major increment from 2015, yet given the country’s high cell phone and versatile web reception rates, it’s to be expected.

Source: Statista 2021
10. FINDINGS OF THE STUDY:
- It has been found that customer inclinations are changing from electronic to mobile trade
- Mobile phone is becoming essential part of individual’s life. Globally 67% of population are having own mobile phone. Thus, mobile market has huge potential to enhance more productive and profitable business environment.
- Mobile users are 79% of smartphone user used for online shopping through smartphone.
- Indian retail industry is witness of transaction through mobile sales. It is again forecasting to grow $37.96 billion by 2020.
